

# Progress Report

---

Document finished:

1. Proposal
2. Wireframe
3. Document (~Requirement document)
4. Initial Database design

Implemented:

1. User Authentication
2. Tables
  - Users
  - Orders
  - Inventory
3. Adding item
4. Deleting item
5. Editing item
6. Adding user
7. Deleting user
8. Registering an account

To do:

1. Acquiring Data
2. Finishing up all the implementations per requirement document and wireframe
3. Final Report and so on

Above is the list of the progress that I have done, and the things needed to be done before the end of next quarter. I'll continue to work on implementing the requirements. The goal is to finish everything so that my uncle will be able to use it starting Winter, 2020. Most of the implementations are needed to be done, and I'm hoping I could finish during the summer so that I could start working on documentation and testing in the Fall.

Thanks Professor Dekhtyar for accepting my Senior Project.
